

**Year 3**

**Computing**

**Age Related Expectations**

**Coding**

Write simple algorithms to control the action of a device. Understand that these can be repeated to work more efficiently. Be confident in explaining to others the reason why a sequence worked or had to be modified. Be aware that things in the real world are controlled by input devices.

**Digital Content**

Search local databases, and online sites, and understand the need for accuracy. With help, write and publish information for others.

**Application**

Communicate with technology. Know that information is stored and retrieved digitally. Know about real time and virtual worlds

**E-Safety**

Know that they have a password which needs to be secret. Know to tell an adult if they find something online which makes them uncomfortable. Know that the school has an Acceptable Usage Policy. Recognise that online work belongs to others.
